令和 9 年度　総合型選抜（自己推薦）　出題意図と模範解答

第1問

Recently, the issues faced by Culturally and Linguistically Diverse (CLD) children* have gained attention in Japan. Although the total number of CLD children has not been identified, it is estimated that there are more than 80,000 children needing specialized Japanese language instruction, and many of them face difficulties in Japanese society due to social isolation and lack of support. Describe one or more ideas you would like to introduce to help CLD children have better experiences in Japan. Your response should be about 150 words in English.

*CLD children：CLD 児(文化的・言語的に多様な背景を持つ児童や生徒)

近年日本で増えている文化的・言語的に多様な背景を持つ子供たちが直面する問題の解決方法について、自らの考えを他者に対してわかりやすく英語で伝える力を問う問題。CLD 児に対する知識や社会的関心があるか、求められていることに的確に答える内容となっているか、主題を支持する文が書けているか、アウトラインがわかりやすいか、スペルミスや文法の誤りがないか、英語の表現力があるかを採点の基準とする。

模範解答

A buddy system would help CLD students succeed at school. Local students could volunteer to help the CLD students during lessons. If each CLD student had a Japanese buddy in their classes, they would always have someone to ask for help. This would give them a way to deal with their language difficulties, as speaking with one person is much easier than participating in a group conversation in a second language. In addition, the student buddies could help introduce the CLD students to other members of the class. This could help CLD students build their own network of friends in school. This would help them feel more comfortable in the classroom. The CLD students' buddies, friends, and classmates would benefit by learning about cultural differences. So a buddy system would benefit the CLD students, the local students, and the class as a whole.

第2問

ChatGPT has been available publicly for about four years. During that time, most teachers and students have used ChatGPT or similar AI tools for educational purposes. Describe one positive way university students can use AI tools to support their learning. State your opinion clearly and provide supporting information. Your response should be about 150 words.

生成 AI の教育的活用についての自らの考えを、他者に対してわかりやすく英語で伝える力を問う問題。生成 AI の現状に対する知識や社会的関心があるか、求められていることに的確に答える内容となっているか、主題を支持する文が書けているか、アウトラインがわかりやすいか、スペルミスや文法の誤りがないか、英語の表現力があるかを採点の基準とする。

模範解答

An AI tool like ChatGPT can help students find information and better understand difficult topics. Sometimes students do not understand ideas from the textbook or class lectures, but they are too shy to ask in class. They may also be too embarrassed to ask other students for help understanding the material. In this situation, students can use ChatGPT to explain ideas discussed in class and find more information on the topic. AI can explain difficult topics in simple words and make it easier for students to study on their own. It can also help them find other helpful information online. Once they find more information to help them understand the topic better, they can use the same AI tools to test their knowledge. They can have ChatGPT ask them questions to test their understanding. In this way, students can use AI tools as personal tutors to support their learning. (149 words)
